INDUSTRY EXPERIENCE

Microsoft

Redmond, WA

Product Manager - Machine Learning/AI

July 2023 - August 2025

Agent Guided Conversations

- Managed 5-person feature crew to deliver proof of concept agent framework to drive a conversation with a human to achieve a set goal within specified constraints
- Conducted 10+ user interviews to understand the struggles & successes of the “creators” of our framework
- Identifying 3+ internal product teams to leverage our learnings and adopt modular components of our framework

Analytics for Microsoft Copilot Studio

- Designed Power BI Dashboard to surface granular feature-level usage metrics of Microsoft Copilot Studio to understand health & usage trends of both 1P makers and 3P customers
- Created 5+ UX Mockups in Figma visualizing key metrics to answer leadership business questions around usage

IcM Assistant for Automated Email Support

- Managed 5-person feature crew to deliver internal LLM-Powered Troubleshooting Assistant saving an **estimated ~\$1.07M** in annual support costs for Microsoft
- Created User Experience Diagram + Manual Test Set to evaluate quality of LLM responses to customer issues

Personalized Activity Prediction Platform (PAP)

- Managed 5-person feature crew to improve PAP platform driving COGS savings and performance improvements by intelligently predicting end-user activity to make operational optimization decisions across Microsoft Services
- Wrote generalized onboarding spec for PAP platform to onboard new product teams detailing data requirements

INTERNSHIP EXPERIENCE

Tesla

Austin, TX

Technical Program Manager Intern

September 2022 – December 2022

- Automated door manufacturing line **boosting production rate by ~23%** by enabling factory software to automate validation of each part installation
- Utilized SQL and Postman for data analysis of production rates to provide valuable insights on bottlenecks
- Built dashboard visualizing production KPIs to drive informed decision making on areas of improvement

Microsoft

Redmond, WA

Program Manager Intern

May 2022 - August 2022

- Performed Competitive Analysis comparing HoloLens specifications and functionality vs. competitors products
- Maintained non-technical and technical documentation, including architecture diagrams, functionality, & apps
- Communicated with 3P customers to understand pain points of existing HoloLens technology

AT&T Technologies

Dallas, TX

Technical Program Manager Intern

June 2021 - August 2021

- Engaged with cross-functional teams to analyze requirements, user needs, & key functionality to define short-term roadmap for a hiring tool to reduce attrition rates
- Led a team of 3 interns to create an internal PR assignment tool utilizing React & Django frameworks
- Ideated proof of concept of new HBO Max recommendation feature based on user's watch history

LEADERSHIP

Microsoft Lunch & Learn V-Team

December 2023 - Present

- Organizing weekly learning sessions showcasing work detailing emerging AI technologies across industries
- Maintaining sharepoint page updating content and upcoming presentations to boost engagement
